PräDeck

With the **PräDeck** the two boards and the spine hollow are placed accurately and with the exact joint width on to the glued cover material.

Standard delivery includes a set of joint bars of 8 mm width. Other widths as of 4 mm are available by request.

The width of the spine hollow is progressively adjustable from 6 mm to 100 mm by means of a precise adjustment mechanism with hand lever. The table is equipped with holes and two suction

fans mounted underneath. Curly cover materials may be sucked to the table by means of a foot pedal.

Standard features of the **PräDeck** include an illuminated table. Two centering lines on the table plate facilitate the alignment of pre-printed cover materials.

Moreover, the machine is equipped with an adjustable stop to quickly align different cover widths and the overlap.

Options:

- Joint formers in special widths as of 4 mm
- Table extensions, three parts
- Corner cutter **PräZis**

Applications:

textile, leather and cloth cases

foamed cases

cellophaned book cases

paper covers
